Peace, mercy and blessings of God,

Reference to the received inquiries to our Management from some of companies regarding the radiation inspection for some of the imported products coming from Japan to make sure that these products are free of any radiological elements.

I am pleased to report the necessity to continue to conduct the radiation inspection for the imported goods coming from Japan prior the issuance of a certificate of conformity for the imported goods to the kingdom.

General Manager of Laboratories and Quality control

Habib bin Mohammad AbdulSamad
